

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Commonwealth of Massachusetts.

*To the Honorable Senate and House of Representatives of the Commonwealth
of Massachusetts in General Court assembled.*

The undersigned commissioners, appointed under the provisions of chapter 476 of the Acts of 1893, entitled "An Act to provide for the appointment of a Highway Commission to improve the public roads, and to define its powers and duties," and under the provisions of chapter 474 of the Acts of 1900, entitled "An Act relative to the Massachusetts Highway Commission," herewith submit their twelfth annual report.

W. E. McCLINTOCK.

HAROLD PARKER.

JOHN H. MANNING.

BOSTON, MASS., Dec. 29, 1904.

ANNUAL REPORT

OF THE

MASSACHUSETTS HIGHWAY COMMISSION.

In accordance with the provisions of chapter 280 of the Acts of 1903, the commission has had the sum of \$450,000 for new work during the year.

Considerable sums allotted for expenditure during the year 1903 were actually disbursed during the year 1904, unavoidable delays having prevented the completion of several contracts.

Additional lay-outs were made during 1904, amounting to 321,203 feet (60.83 miles), bringing the grand total up to 2,987,748 feet (565.86 miles). The number of miles of road finished during the year was approximately 66, making a total of about 548 miles of completed State highway at the end of the year 1904. On most of the remaining 18 miles laid out but not completed the work is in various stages of progress, although in a few instances no work will be done under the contracts before the coming spring.

Since the passage of the "small town act," in 1900, 75 miles of road in the "small towns" have been improved.

MEETINGS OF THE COMMISSION.

The commission has held 88 meetings at its office in Boston during the past year, besides many others at different points in the State. The regular county hearings provided for in the statutes have generally been well attended.

CONTRACTS.

All work done by the commission must be done by contract, either with the town or city authorities, or, after due advertisement, with private contractors.

During the year 78 contracts for State highways were entered into, of which 28 were with town or city authorities and 50 with private individuals or corporations.

PETITIONS.

The total number of petitions for the location and construction of State highways up to the date of this report is 673. During the year 1904, 27 new petitions were received. These petitions cover altogether 1,710.86 miles of road, and they are from 283 towns and 27 cities. The petitions received during the past year cover 47.6 miles of road not previously petitioned for.

STREET RAILWAYS.

There are at the present time street railways operating on State roads in 113 different cities and towns. In 6 of these municipalities there are two different companies. The length of street railway track in the State on Sept. 30, 1904, according to the Massachusetts Railroad Commissioners, was 2,689.53 miles.

COUNTY ASSESSMENTS.

In accordance with the provisions of the statutes, the several counties in which State roads are built are required to repay to the State one-quarter of the amount expended during the year. The time of this repayment may, if desired, extend over six years from the date of the assessment; but in several instances, including some of those in which the amount of the assessment is greatest, the counties have preferred to pay the entire sum due at the end of each year. The amount assessed upon the counties during the year 1904 was \$132,818.25.

CONSTRUCTION.

No material change has been made during the past year in the method of building roads. The question of foundation for roads over clayey and other non-porous soils is receiving the careful consideration of the commission. The telfording foundation and centre V-shaped drains are being closely watched with reference to their behavior when the frost is coming out of the ground in the spring. On no State road

has there been a failure of well-laid telfording foundations; neither has there been a failure of any V-shaped drains since the building of the first one by the commission, three years ago. They are apparently as effective as the telfording foundation and side drains combined, and cost much less to build.

Most of the gravel roads are wearing satisfactorily, and the cost of repairs is small.

The Swampscott road, built of gravel in 1897, cannot be maintained economically with a gravel surface. The gravel is expensive, it is much affected by frost, and has poor wearing properties. This road will be surfaced with broken stone during the coming year.

CULVERTS AND BRIDGES.

Most of the culverts and short bridges built during the past year have been of reinforced concrete.

The following bridges of reinforced concrete have been built during the past year:—

Auburn,	Two beam bridges, spans of 24 and 16 feet.
Douglas,	A beam bridge over the Mumford River, of 22 feet span.
Fitchburg,	A beam bridge over Falula Brook, of 27 feet span.
Granville,	An arch bridge over Dickinson Brook, of 31 feet span, designed and specifications prepared by the commission, but built and paid for by the town of Granville.
Natick,	An arch of 10 feet span, extended and wing wall built.
Reading-North Reading,	A beam bridge over the Ipswich River at the Reading-North Reading boundary line, of 28 feet span.
Seekonk,	A beam bridge, of 12 feet span.
Shrewsbury,	A beam bridge, of 13 feet span.
Westminster,	A beam bridge, of 12 feet span.
Weymouth,	A beam bridge, of 14 feet span.

All culverts of 2 feet span or over have been built of reinforced concrete.

In 1901 two bridges were built over the Weweantit River, near the dividing line between the towns of Wareham and Marion. These bridges respectively consisted of four and five bents, of cast-iron piles, with four piles in each bent. An electric railway is laid over both bridges, at one side. There has been a gradual settlement of the piles, under the railway, the settlement beginning to show shortly after the bridges were opened to traffic. The cross-girders were this year jacked up to the original grade, and held there by cast-iron plates of the proper thickness. Careful watch will be kept of this bridge, and spur shores will be driven and secured to the different bents, if any further settlement takes place.

MAINTENANCE.

The law of 1900 requires a payment to the Commonwealth by each municipality in which State roads are built of the cost of maintenance of such roads, but not exceeding \$50 for each mile of State road in the respective municipalities. The total cost of repairs was \$51,896.16 in 1904; there will be paid back into the State treasury the sum of \$20,631.25, or about 39.76 per cent. of the total cost.

In certain parts of the State the maintenance of State roads is more economically and better done by contract than by day work. This is because of a local demand for labor which makes it practically impossible to get men or horses to work on the road during parts of the year when repairs are most needed.

The method of continuous repairs has been pursued during the present year, the intention of the commission being to have all parts of State roads in good condition at all times.

Nine contracts for maintenance are now in operation, covering 63.19 miles of road.

On roads where no contract exists, the work is done under the direction of the division engineer. All State roads are inspected sufficiently often to discover and remove defects in a reasonable time after they appear.

The Norton road, built under the "small town act," was resurfaced, as the original road was not able to withstand the traffic. The cost of this work was \$844.69, or 27.9 cents per square yard.

Short pieces of the roads in Worcester, Williamstown, West Springfield and Great Barrington, which had shown signs of weakness, were either ripped up and strengthened by using V-drains, or the drainage was improved by building side drains. The Milton road, over the marshes, having continued to settle, was raised to grade by the use of gravel and broken stone.

Resurfacing has been done on parts of the State roads in Worcester (at the Holden line), Holden, Westport, Fairhaven, Rehoboth, Williamstown, West Springfield, Lowell (Princeton Street), Gloucester, Shelburne, Deerfield (South) and Westminster. An analysis of the work on these roads is given in the accompanying table.

TABLE SHOWING EXTRAORDINARY REPAIRS ON MASSACHUSETTS STATE ROADS DURING 1904.

TOWN OR CITY.	Year of Lay-out.	Length (Feet).	Width (Feet).	Square Yards.	Tons of Stone.	Broken Stone Per Square Yard (Tons).	Cost.				Kind of Stone used.
							Totals.	Per Square Yard.	Per Square Yard per Year.	Broken Stone in Place, per Ton.	
Worcester,	1897	3,500	15	5,333	606	.0208	\$1,029 72	Cent.	Cent.	\$1 70	Local.
Holden,	1898	2,209	15	3,682	508	.0273	950 75	29.0	3.530	1 89	Local.

Totals,	-	9,01†	-	84,999	11,616	.0203	\$23,012 39	29.0	4.013	\$2 00	

* In resurfacing, the original thickness was increased to give added strength. The original road was of trap in Williamstown, West Springfield, Lowell and Deerfield; the rest were of local stone.

† Miles.

The use of a thin coating of sand is found to be the best method for preventing the stone from raveling in dry weather. Sand is now used for this purpose on practically all State roads that show a tendency to ravel.

When the grade of Pipestave Hill, on the West Newbury road, was reduced, there was a heavy cut through clay, and a long, steep bank was left, which has ever been a source of annoyance and cost, by reason of wash-outs which filled the gutter and partly covered the road. Two years ago the commission experimented by covering this slope with a mattress of willow logs and limbs. The willow shoots have got a good start over the entire surface of the slope, and the washing is stopped.

The commission would recommend that there shall be appropriated out of the treasury of the Commonwealth the sum of \$60,000 for the proper maintenance of the State highways, subject to the provisions and limitations of section 16 of chapter 47 of the Revised Laws.

"SMALL TOWN" WORK.

The work of the commission, under the Acts of 1900 and 1901, relating to "small towns," has been continued during the past year on very much the same lines as has been stated in previous reports.

It can be seen by any interested observer that the expenditure of the public funds in aiding and instructing the smaller towns has already been of vast practical value. The work thus done has not only excited great interest among the townspeople, as showing them how, with the material they have at hand, a much-improved highway can be secured without greater cost, but has actually accomplished it under their immediate observation. This actual demonstration is worth more to the practical countryman than all the theoretical claims that could possibly be made, and gets much nearer to the people themselves than the construction of more expensive and complete State highways does. This is so largely because the so-called "small town" work is more nearly what they can afford to build themselves. The commissioners have personally made themselves acquainted with the needs and desires of these

“small towns,” and have talked with the selectmen and road superintendents, and have aided them by their advice as to where and how the allotted sums should be spent. The engineers of the commission, who have become expert under their long experience, are of great service in solving the many problems that are presented.

On the whole, the effect of this act as it has been executed by the commission has been satisfactory, and much good to the travelling public has resulted; but in order to secure the best results entire co-operation of the towns and their officials should be secured, so that the work begun as referred to should be continued and improved on after the State engineers have finished their part. It too often happens that the work of repair and maintenance, in other parts of a town in which the State has rendered aid, is carried on in the old and wasteful manner, and this notwithstanding the acknowledged improvement of the commission's methods. It is, however, true that a great improvement is manifest. As has been suggested in a previous report, the aid that can be extended to any town is but 40 per cent. of its own annual expenditure for road purposes. It often happens that some small town, which expends on its highways but a few hundred dollars per year, is the very one that has the hardest hills and the worst roads, and that their roads are used, to a very large extent, by travellers from without its limits. It thus follows that where great public need for improved roads exists the hands of the commission are tied, and no material improvement can be secured. This defect in the operation of the law could be overcome if authority were given the commission to make greater outlay in such places than the 40 per cent. permitted by the law.

There have been received by the commission 299 petitions from 104 towns, and 213 allotments have been made to 88 towns, including 21 allotments which have been made to 13 towns under the provisions of the act governing towns of over \$1,000,000 valuation. The total allotments to towns of less than \$1,000,000 valuation has been \$120,500, and in towns of over \$1,000,000 valuation \$24,514.30.

LYNN ROAD.

On May 26, 1902, a special appropriation of \$100,000 was made for building a road outside of the Boston, Revere Beach & Lynn Railroad, between the Saugus River and Commercial Street in the city of Lynn.

The entire length of this proposed road is laid over salt flats and marshes, the fill varying from 5 to 13 feet.

The work of building the embankment to grade 12 was advertised, and bids were opened on Nov. 13, 1903. There were nine bids received. The contract was awarded to the lowest bidder, Mr. Fred E. Ellis of Melrose, the contract price being \$56,725.

The estimated quantities in this work are as follows, viz. : —

Cubic yards of earth fill,	76,500
Cubic yards of rock embankment,	15,000
Square yards of riprap,	1,600
Portland cement concrete culverts,	4
Feet of pipe drains,	175

Work was begun by Mr. Ellis on April 4, 1904, and has been pushed as rapidly as the difficult conditions would permit. There are in place 34,500 cubic yards of earth, 9,150 cubic yards of rock and 1,130 square yards of riprap. Three of the four culverts have been built. It is hoped that the work under this contract will be finished by June 1, 1905. The remainder of the work will soon be advertised, and, barring accidents, the road finished in the latter part of the coming year.

The only interesting feature of the planning of this road is the rock embankment on each side, laid on a slope of one to one, and ending at grade 12; this takes the place of a riprap. The space between the rock embankments was filled in with sand and other soil from the adjacent flats. Part of this sand was thrown up by dredgers, using buckets of the "Orange peel" type, but most of it was dragged in by a scoop bucket, attached to cables, worked by a 50 horse-power engine. The cables were run through pulleys made fast to wooden towers, one on the filled bank, the other 700 feet out on the flats.

After the sand was filled in behind the rock embankment, it was found that near the top of the wall it was moved by the swash of the water at high tide. This was obviated by filling in behind the top of the wall with stone chips, to give a thickness of wall and chips of 4 feet.

STEAM ROAD ROLLERS AND STONE-CRUSHING MACHINERY.

The commission has under its control 17 steam rollers and two portable stone-crushing plants. These were purchased primarily for the use of small towns which have made appropriations for building roads, but own no road machinery.

The steam rollers were used 660 days on town work in 24 different towns. All requests of this character were granted. They were also used 270 days on State highway repair work, on 32 different roads; 374½ days by towns contracting for building State roads, including the "small town" roads; and 181 days by private contractors, on State road contracts. The total number of days' work during the year was 1,485½, — an average of 87.38 days for each roller.

The total cost for maintenance for the year was \$1,877.76. The average cost of keeping the rollers in repair was \$1.26 for each day they were used.

The request from town officers has been about the same as in previous years. Good work is being done, and work which could not well be done by the towns in any other way.

With heavy machinery, such as this, subjected to hard usage, which is unavoidable, the cost of repairs must of necessity be large. Three of the rollers, Nos. 5, 8 and 10, purchased in 1896 and 1897, will need to be sent to the shop this winter for thorough repairs. The estimated cost of these repairs is \$2,100.

One of the portable crushers has been located in the town of Sandisfield, where it has done good service; the other was used in Carver and Hanson. The stone for 1.72 miles of stone roads was crushed by these machines, a total of about 3,500 tons. The entire cost of repairs and for moving has been borne by the towns using the crushers.

SURVEYS AND ENGINEERING OFFICE WORK.

During the year surveys for preliminary studies, estimates and lay-outs were made in 37 towns, — a total length of 49.62 miles ; and grade stakes for construction work set in 100 towns for a length of 89.04 miles, part of these being for unfinished work in 1903.

Final surveys were made in 66 towns, — a total length of 69.36 miles. Surveys for “small town” work were made in 21 towns, — a total length of 7.76 miles ; and about 6.35 miles of miscellaneous surveys were made for roads to be constructed by towns.

Plans, profiles and cross-sections were plotted of surveys in 45 towns, representing a length of 50.19 miles.

Lay-out plans have been made of roads in 64 towns, of a total approximate length of 60.90 miles. Plans to accompany decrees for street railway locations on State roads, and for provisional locations, have been made in 10 towns. Plans and profiles have been made for work under the “small town” act in 21 towns.

Preliminary estimates in 96 towns, representing 93.77 miles, have been made ; and also final estimates in 69 towns, representing 72.01 miles.

Bridge plans have been made for all the bridges constructed during the year ; and also studies and plans have been made for an arch bridge over the Assabet River in Concord, an arch bridge over the Three Mile River at the Taunton-Dighton boundary line, and a beam bridge over Walker Brook in Becket, all of reinforced concrete.

The surveys of roads to be built by the towns, and paid for out of their own funds, constitute no small part of the year's work of the survey parties. The surveying and supervising the building of these roads is, next to the building of State roads, the most important work of the commission. In this way town officers get the full advantage of the experience of the commission and its engineers.

TREE PLANTING.

Although authorized by the statute, the commission has not, until the past year, taken up the problem of tree planting along the State roads. The question has been discussed during previous years, but for various reasons it was not considered expedient to begin any extended work of this kind until the continuous reaches of State roads had been extended to such lengths that a consistent method or scheme could be reasonably developed. In the opinion of the commission, the State highways, extending in places for many miles unbroken, are now of sufficient length to warrant it in adopting a general plan, which can be applied as the roads are built. Under the direction of the commission, a report showing the land along the State roads that was available or desirable for the planting of trees, the character of the soil in all such places, and whether upland or meadow, has been made by the division engineers. This report, with the plans in possession of the Board, enabled it to decide that about 4,000 trees could be economically set out during the year. It was determined, by an investigation of the conditions prevailing, that a certain number each of several kinds of trees, maple, elm, oak, poplar, etc., would be needed to carry out the plan in view. Proposals for bids to furnish the whole number were submitted to many of the nurseries. The contract was awarded to Ellwanger & Barry of Rochester, N. Y., the lowest bidder. Mr. Edward W. Breed of Clinton was appointed by the Board to superintend the planting and to care for and inspect all trees, and to establish a nursery into which they were to be placed until ready for final setting. Fourteen hundred and twenty-five of them were set out in the spring, and 2,219 this autumn; 159, the balance, still remain in the nursery.

In the placing of these trees the Board has taken into consideration not only the natural conditions of soil and locality, but has had due regard to the character of the roadside surroundings, so that the trees in all places should be in harmony therewith. Each tree has been inspected, and, if imperfect, rejected. The size of each variety of tree was regulated by the contract, in order that only such trees as would bear trans-

planting safely and with the best results should be furnished. The total number of trees planted during the year has been 3,907: 1,737 maples, sugar, Norway and white; 538 oak, red, scarlet, white and pin; 1,000 elm; 207 poplar; some white pine and locust.

The total cost of these trees in their final location, including transplanting in the temporary nursery and replanting on the roadside, care, manure, superintendence and labor, has been \$4,348.59, or an average of \$1.14 per tree. The work has been so carefully done that the percentage of loss has been very small.

Although the average cost has been \$1.14, as stated, some trees have cost very much more than others. In dry, gravelly or sandy soil considerable cost has been entailed in bringing in loam and fertilizers sufficient to insure their life and future growth. This has been especially true of most of the Cape roads; and, in addition, most of the trees exposed to continuous winds from one direction have had to be supported by wooden guards.

The Board feels that the cost of planting roadside trees, and in some places native shrubs and vines, is a wise outlay of State funds, as not only do they add to the beauty and interest of the State highways, but they materially protect and preserve them.

The Appendix contains the report of Mr. Breed.

Under the existing laws, the responsibility for the care of shade trees located within the limits of the State highways is not definitely established, and the commission believes that it does not possess sufficient authority to protect them from mutilation or destruction. The present law appears to be particularly defective, when it is understood that the trees planted by and at the expense of the Commonwealth are under the control of local tree wardens, who are not officers of the Commonwealth.

The commission recommends the passage of an act to remedy the defects in the law, and respectfully submits a draft of a bill, which may be found under the caption "New Legislation."

AUTOMOBILE REGISTRATION.

Under the provisions of chapter 473 of the Acts of 1903, it became the duty of the Massachusetts Highway Commission to register all automobiles and other motor vehicles in this State, and to license the operators of such machines.

To Jan. 1, 1905, 3,772 automobiles and 489 motor cycles were registered, and 80 manufacturers or dealers received certificates of registration. There were 3,585 ordinary operators and 1,335 professional chauffeurs licensed.

The receipts for fees were as follows, for 1904 : —

For 4,261 certificates of registration,	at	\$2 00	\$8,522 00
80 certificates of registration for manufacturers or dealers,	at	10 00	800 00
3,585 ordinary licenses to operate,	at	2 00	7,170 00
1,335 professional chauffeurs' licenses,	at	2 00	2,670 00
Total,			<u>\$19,162 00</u>

Under the provisions of this act, the Secretary has deposited the sum of \$19,166 in the State treasury, and taken proper receipts therefor.

The excess of \$4 is due to the fact that two applicants for licenses (James W. Hillyard of New York City, and John J. Brennan of Salem) have not completed their applications; the license fees, however, were retained and deposited.

In addition to the number of private operators' licenses given above, one license (No. 4158) was issued in April, 1904, to Carroll Doubleday, of Winchester (application No. 3205). The application for this license was received in 1903, but was returned for correction, the fee of \$2 being retained and deposited.

The act of 1903 that regulates the use of motor vehicles on the highways of the Commonwealth designates the Massachusetts Highway Commission as the court for suspending or revoking certificates for automobiles and licenses for operators. The commission has tried 16 cases under this act. All of the cases up to the present time were for simply overspeeding.

The treatment of this matter by the different municipalities has a wide range. Some of the towns accept the speed limit

of the act, others fix their own limit of speed ; some of these last named towns specify 4 or 6 miles an hour as the maximum speed. Most of the towns make no apparent effort to enforce the speed law, while others are quite active in this direction. Many of the towns that attempt to enforce the speed law do the work spasmodically, during five days of the week paying no special attention to it, but insist upon a close adherence to the law on Saturdays and Sundays.

The inequality of the local speed laws, and the still greater inequality in enforcing the law, tend to bring the whole law into contempt. Well-ordered, law-abiding men, owning and operating automobiles, are anxious to regulate their use, so as to insure the safety of other users of the highways ; but there is a grave question in their minds whether the present law will accomplish this end.

From many conferences with automobilists, with those who drive horses, and by personal observation, the commission believes that there are places and times when the speed as at present fixed is either too great or too small. There are certain narrow streets, within fire districts, and also certain crooked outlying roads, where 10 miles an hour is a dangerous rate of speed ; there are other roads, straight and clear of obstruction, with no houses or cross roads, where the speed may safely be in excess of 15 miles an hour. No general law can cover these cases ; each case should be carefully considered by itself.

There are some absurdities resulting from local regulation, which seem to bring discredit upon this method. Four miles an hour, over a State road where there are few houses and no cross roads, is neither necessary nor reasonable ; the order is not enforced by the town officers, and its existence is harmful.

The commission believes that the power to vary the speeds from what they are in the present act should be given to some central authority ; no change to be made except after a hearing.

The rates of speed, when different from those indicated in the act, should be plainly displayed on sign boards at each end of the road affected, and at such other points as may be needed. These sign boards should be placed by the person or persons charged with fixing the speed, the cost to the State to be repaid out of the automobile license receipts.

With the law amended in the manner suggested, the commission believes that it can be executed in a proper manner.

If the commission is to continue to sit as a court, with power to suspend or revoke certificates of registration and licenses to operate, it recommends that it be given power to summon witnesses and administer oaths.

Section 6 of the present act, dealing with foreign machines, is contradictory and ineffective. This section permits automobiles or motor cycles, owned by non-residents of this State and driven by a person residing and licensed in some other State, to be operated on the roads and highways of this State, subject to the speed limitations of section 8, and to any local regulations permitted under section 14, and to such further regulations as the Highway Commission may make. In fact, foreign machines are in many instances driven over Massachusetts roads with four or more number plates besides the number plate furnished by the commission. It is practically impossible to identify a machine under these conditions. If a foreign machine is persistently made to break the speed law, there is no way of punishing other than by fining the operator. The operator not being required to take out a license, or the owner a certificate of registration, no complaint made to the commission can be effectively acted upon.

The commission believes that the only effective way to treat foreign machines is to require them to carry only Massachusetts numbers, and to remove all other number plates; in other words they should be treated exactly as other machines are treated.

The commission recommends the repeal of section 6. The commission also recommends that the last sentence of section 6 be added to section 5, believing that this was the intent of the Legislature at the time of the passage of the act.

A draft of a bill containing the changes in the law recommended will be found under the caption "New Legislation."

NEW LEGISLATION.

The commission recommends the passage of the following bills, which have been discussed in the foregoing under their proper headings :—

AN ACT RELATIVE TO SHADE TREES ON THE PUBLIC WAYS.

Be it enacted, etc., as follows :

SECTION 1. The highway commission shall have the entire care and control of all shade trees within the limits of state highways, and may trim, cut or remove such trees, or license the trimming, cutting or removal of such trees.

SECTION 2. Section one hundred and four of chapter two hundred and eight of Revised Laws is hereby amended by adding after the word "town," in the sixth line thereof, the words:—or from the highway commission in the case of a state highway,—so as to read as follows:—*Section 104.* Whoever affixes to a tree in a public way or place a playbill, picture, announcement, notice, advertisement or other thing, whether in writing or otherwise, or cuts, paints or marks such tree, except for the purpose of protecting it and under a written permit from the officer having the charge of such trees in a city or from the tree warden in a town or from the highway commission in the case of a state highway, shall be punished by a fine of not more than fifty dollars for each offence. The tree warden shall enforce the provisions of this and the preceding two sections in towns.

SECTION 3. Whoever without authority cuts down or removes a shade tree within the limits of a state highway, or maliciously injures, defaces or destroys any such tree shall forfeit not less than five nor more than one hundred dollars to the use of the commonwealth.

SECTION 4. This act shall take effect upon its passage.

AN ACT RELATING TO THE REGISTRATION OF AUTOMOBILES AND MOTOR CYCLES AND TO THE LICENSING OF THE OPERATORS THEREOF.

Be it enacted, etc., as follows :

SECTION 1. In the administration of the law providing for registering automobiles and motor cycles and for licensing operators thereof, any member of the Massachusetts highway commission or its secretary may summon witnesses in behalf of the Commonwealth and may administer oaths and take testimony; and any person who wilfully swears or affirms falsely in regard to any matter or thing respecting which such oath or affirmation is required by said commission shall be deemed guilty of perjury. The fees of such witnesses for attendance and travel shall be the same as for witnesses before the superior court, and shall be paid from the treasury of the Commonwealth, and a certificate of the commission shall be filed with the auditor; and any justice of the superior court, either in term time or in vacation, upon application of the commission, may, in his dis-

cretion, compel the attendance of such witnesses and the giving of testimony before the commission in the same manner and to the same extent as before said court.

SECTION 2. Section one of chapter four hundred and seventy-three of the acts of the year nineteen hundred and three is hereby amended by striking out the last sentence thereof, and substituting in place thereof the following:— Upon the transfer of ownership of any automobile or motor cycle its registration shall expire, and the person in whose name such vehicle is registered shall immediately return the certificate of registration to the highway commission, with a written notice containing the date of the transfer of ownership, and the name, place of residence and address of the new owner. No number or number plate other than those prescribed by the Massachusetts highway commission in its certificates of registration shall be displayed on any automobile or motor cycle operated in this Commonwealth,—so that said section will read as follows:— *Section 1.* All automobiles and motor cycles shall be registered by the owner or person in control thereof in accordance with the provisions of this act. Application for such registration may be made, by mail or otherwise, to the Massachusetts highway commission or any agent thereof designated for this purpose, upon blanks prepared under its authority. The application shall, in addition to such other particulars as may be required by said commission, contain a statement of the name, place of residence and address of the applicant, with a brief description of the automobile or motor cycle, including the name of the maker, the number, if any, affixed by the maker, the character of the motor power, and the amount of such motor power stated in figures of horse power; and with such application shall be deposited a registration fee of two dollars. The said commission or its duly authorized agent shall then register, in a book to be kept for the purpose, the automobile or motor cycle described in the application, giving to such automobile or motor cycle a distinguishing number or other mark, and shall thereupon issue to the applicant a certificate of registration. Said certificate shall contain the name, place of residence and address of the applicant and the registered number or mark, shall prescribe the manner in which said registered number or mark shall be inscribed or displayed upon the automobile or motor cycle, and shall be in such form and contain such further provisions as the commission may determine. A proper record of all applications and of all certificates issued shall be kept by the commission at its main office, and shall be open to the inspection of any person during reasonable business hours. The certificate of registration shall always be carried in some easily accessible place in the automobile or motor cycle described therein. Upon the transfer

of ownership of any automobile or motor cycle its registration shall expire, and the person in whose name such vehicle is registered shall immediately return the certificate of registration to the highway commission, with a written notice containing the date of the transfer of ownership, and the name, place of residence and address of the new owner. No number or number plate other than those prescribed by the Massachusetts highway commission in its certificates of registration shall be displayed on any automobile or motor cycle operated in this Commonwealth.

SECTION 3. Section 2 of chapter four hundred and seventy-three of the acts of the year nineteen hundred and three is hereby amended by striking out the word "license," in the last sentence thereof, and substituting in place thereof the words: — certificate of registration, — so that said section will read as follows: — *Section 2.* Every manufacturer of or dealer in automobiles or motor cycles may, instead of registering each automobile or motor cycle owned or controlled by him, make application upon a blank provided by said commission for a general distinguishing number or mark, and said commission may, if satisfied of the facts stated in said application, grant said application, and issue to the applicant a certificate of registration containing the name, place of residence and address of the applicant, and the general distinguishing number or mark assigned to him, and made in such form and containing such further provisions as said commission may determine; and all automobiles and motor cycles owned or controlled by such manufacturer or dealer shall, until sold or let for hire or loaned for a period of more than five successive days, be regarded as registered under such general distinguishing number or mark. The fee for every such certificate of registration shall be ten dollars.

SECTION 4. Section four of chapter four hundred and seventy-three of the acts of the year nineteen hundred and three is hereby amended by adding at the end of said section the following: — "The provisions of this section shall not prevent the operation of automobiles by unlicensed persons if riding with or accompanied by a licensed chauffeur or operator. The operator's license shall always be carried by the licensee when he is operating an automobile or motor cycle, — so that said section will read as follows: — *Section 4.* Licenses for operating automobiles and motor cycles shall be issued by the Massachusetts highway commission or duly authorized agents thereof. Application shall be made upon blanks prepared by the commission for this purpose, and the licenses issued shall be in such form and shall contain such provisions as said commission may determine. To each licensee shall be assigned some distinguishing number or mark, and a proper record of all applications for license and of all licenses

issued shall be kept by the commission at its main office, and shall be open to the inspection of any person during reasonable business hours. Each license shall state the name, place of residence and address of the licensee and the distinguishing number or mark assigned to him. Special licenses for operating automobiles or motor cycles for hire shall be issued by the commission, but no such license shall be issued until the commission or its authorized agent shall have satisfied itself or himself that the applicant is a proper person to receive it. Such licenses shall be granted for one year only. The fee for each license to operate shall be two dollars. All fees shall be deposited at the time of making the application. The commission may at any time suspend or revoke any license for any misconduct of the licensee. Before a license to operate is granted, the applicant shall pass such examination as to his qualifications as may be required by the state highway commission. The provisions of this section shall not prevent the operation of automobiles by unlicensed persons if riding with or accompanied by a licensed chauffeur or operator. The operator's license shall always be carried by the licensee when he is operating an automobile or motor cycle.

SECTION 5. Section eight of chapter four hundred and seventy-three of the acts of the year nineteen hundred and three is hereby amended as follows, by inserting at the beginning of said section the following words:— Except as otherwise herein provided; and by adding at the end of said section the following:— *provided, however*, that should the Massachusetts highway commission determine, on the petition of any interested party, after a public hearing, that on any particular way a speed greater than as hereinbefore specified may be permitted with safety, or that a lesser speed than as hereinbefore specified should be required, said commission may make such special regulations as may appear to it to be necessary. No such special regulation shall be effective unless notice of the same is posted conspicuously, by or under the direction of the Massachusetts highway commission, on sign boards at the points where any road affected thereby joins other roads. The cost of said sign boards and the expenses in connection with their erection and maintenance shall be paid out of the appropriation for expenses in connection with the registration of automobiles and motor cycles and the licensing of operators thereof. Nothing herein contained shall be so construed as to affect the rights of boards of park commissioners, as authorized by law,—so that said section will read as follows:— *Section 8.* Except as otherwise herein provided, no automobile or motor cycle shall be run on any public way or private way laid out under the authority of statute outside the limits of a city or the thickly settled or business part of a town or fire district at a speed exceeding fifteen

miles an hour, or within a city or the thickly settled or business part of a town or fire district at a speed exceeding ten miles an hour. Upon approaching a crossing of intersecting ways, also in traversing a crossing or intersection, and in going around a corner, or a curve in the highway, every person operating an automobile or motor cycle shall run it at a rate of speed less than that hereinbefore specified and at no time greater than is reasonable and proper, having regard to traffic and the use of the way and the safety of the public, and in no event exceeding eight miles an hour: *provided, however,* that should the Massachusetts highway commission determine, on the petition of any interested party, after a public hearing, that on any particular way a speed greater than as hereinbefore specified may be permitted with safety, or that a lesser speed than as hereinbefore specified should be required, said commission may make such special regulations as may appear to it to be necessary. No such special regulation shall be effective unless notice of the same is posted conspicuously, by or under the direction of the Massachusetts highway commission, on sign boards at the points where any road affected thereby joins other roads. The cost of said sign boards and the expenses in connection with their erection and maintenance shall be paid out of the appropriation for expenses in connection with the registration of automobiles and motor cycles and the licensing of operators thereof. Nothing herein contained shall be so construed as to affect the rights of boards of park commissioners, as authorized by law.

SECTION 6. Section nine of chapter four hundred and seventy-three of the acts of the year nineteen hundred and three is hereby amended by inserting between the words "license" and "issued," in the third line thereof, the words:—or certificate; and by striking out the word "section," in the third and fourth lines of said section, and substituting therefor the words:—sections two and,—so that said section will read as follows:—*Section 9.* The commission may, after due hearing, suspend or revoke a certificate issued under section one of this act, or the license or certificate issued to any person under sections two and four of this act, for any cause which it may deem sufficient; and any person convicted of violating any provision of this act shall be punished by a fine not exceeding twenty-five dollars for a first offence, and not exceeding fifty dollars for second and subsequent offences. Any person convicted of operating, or causing or permitting any other person to operate, an automobile or motor cycle after a revocation or suspension of the certificate or license granted under this act for such vehicle, shall be punished by a fine not exceeding one hundred dollars, or by imprisonment for a term of ten days, or by both such fine and imprisonment.

SECTION 7. Sections six and fourteen of chapter four hundred and seventy-three of the acts of the year nineteen hundred and three are hereby repealed.

SECTION 8. This act shall take effect upon its passage.

ENGINEERS AND CLERKS.

The engineering work of the commission during the past year has been under the general direction of Mr. Austin B. Fletcher, secretary of the Board.

Messrs. Andrew M. Lovis and Sidney A. Parsons, first and second assistant engineers, respectively, have had charge of the surveying parties and of the office engineering work.

Messrs. William R. Farrington, John A. Johnston, Frank H. Joyner, Franklin C. Pillsbury and Warren B. Wheeler, division engineers, have had charge of construction work in the field.

The following men have been employed as resident engineers of the first class: Messrs. Albert D. Dadley, Lyman L. Gerry, Howard C. Holden, Charles H. Howes, Everell J. Nichols and George R. Winslow.

The following men have been employed as resident engineers of the second class: George R. Brown, Percival H. Everett, Albert W. Gray (3 months), Frank H. Morris, Sidney G. Packard (3 months), Hiram D. Phillips, C. Alden Welton and David H. Winslow.

The following men have been employed as resident engineers of the third class: Messrs. Ernest F. Ayres (8 months), George W. Bagge (11 months), David H. Dickinson (9½ months), Martin W. Fisher (8 months), William P. Hammersley (8 months), Stephen Litchfield, Jr. (9 months), George D. Marshall (9 months), Charles H. Norton, Carl A. Raymond (6 months), George W. Sanborn (8½ months), William G. Addis (6 months), Wilbur T. Wilson (5 months) and Dean C. Warren (3 months).

The following men have been employed on survey work: chiefs of party: Messrs. Emory N. Colburn, Harold R. Starbird and Fred M. Stuart. Rodmen: Messrs. Abram N. Ashline (7½ months), William G. Burns, Warren H. Small (5 months), Henry W. Brown (8 months), Arthur Weston (6

months), Arthur P. Rice (4 months) and Emory S. Bingham (6 months).

The following men have been employed as draughtsmen and office assistants: Messrs. C. Ridgely Brown, Fred H. Cunningham, Arthur Larrabee, Louis T. C. Loring, James H. Taylor, Charles S. Tinkham (9 months), Robert A. Vesper (9 months), William N. Wade, Nathan B. Wilbur (6 months) and Arthur L. Southworth (9½ months).

Mr. Elting J. O'Hara has had charge of the work in the automobile department, under the direction of the secretary; and the following clerks have also been employed in that department during the past year: Carrie E. Batchelder (1 month, 22 days), Chartie W. Brown (3 months, 23 days), Elizabeth M. Connell (7 months, 24 days), John J. Marshall (4 months), Ida L. Poor (1 month, 27 days), Lillian J. Stearns (8 months), Florence L. Tufts (2 months, 13 days), Isabelle Wallace (3 months, 22 days), Frank F. Wyckoff (6 months, 9 days) and George F. Murdock, messenger.

The regular clerical force remains as last reported, with the exception of the promotion of Fred Fair from the position of messenger to that of clerk. The list is as follows: John M. McCarthy, assistant to the secretary; Mary A. Riley and Nellie M. Barlow, stenographers; Edward A. Austin, accountant; Alice M. Worthen, copyist; Fred Fair, clerk.

Mr. George E. Rayner has continued in the employ of the commission as inspector of the road-building machinery.

EXPENDITURES.

The following is a summary of the expenditures of the Massachusetts Highway Commission from Dec. 1, 1903, to Nov., 30, 1904:—

STATEMENT OF CLAIMS AGAINST THE COMMISSION.

[As required by Section 5, Chapter 18 of the Revised Laws.]

NAME.	Residence.	Nature of Claim.
Alvord, Edwin H., ¹	Chester,	Damages due to construction of State road in Chester.
Chace, Charles A.,	Somerset,	Damage caused by drainage conditions on State highway.
Crowell, T. H., ¹	Somerville,	Damages caused by construction of State highway at Chatham.
Daly, Julia M., ¹	Abington,	Damages caused by construction of State highway at Abington.
Davis, Charles H., ^{1,2}	Somerset,	Damages caused by construction of State highway at Somerset.
Donovan, J. H., ¹	Natick,	Damages caused by construction of State highway at Natick.
Dow, Clara B., ²	Amesbury,	Damages due to road construction at Amesbury.
Dow, Granville S.,		
Fisher, Caroline F., ²	Marlborough,	Damages caused by construction of State highway at Marlborough
Flanders, Betsey B., <i>et al.</i> , ²	Amesbury,	Damages caused by construction of State highway at Amesbury.
Flanders, Betsey B.,		
Griffin, John, <i>et al.</i> ,	Natick,	Damages caused by construction of State highway at Natick.
Haas, Mary A., <i>et al.</i> , ³	Shrewsbury,	Damages caused by taking of land at Shrewsbury.
Hagerty, Hannah,	Somerville,	Damages due to alleged accident at Saugus.
Hafey, James J., ¹	Chicopee,	Damages due to construction of State highway at Chicopee.
Hale, Francis J., ^{1,2}	-	Damages due to construction of State highway at Deerfield.
Hudson Co-operative Bank, ²	Hudson,	Damages due to construction of State highway at Marlborough.
Loring, John S., ^{1,2}	Northborough,	Damages due to construction of State highway at Northborough.
Lynch, George, <i>et al.</i> , ¹	Somerset,	Damages due to construction of State highway at Somerset.
McIntyre, Bernard, ¹	Abington,	Damages due to construction of State highway at Abington.
Murray, John B.,	Somerville,	Damages due to alleged accident on State highway at Saugus.
Pierce, Alice,	Topsfield,	Damages due to alleged accident on State highway at Wenham.
Richards, John M., ¹	Quincy,	Damages due to construction of State highway at Quincy.
Salem Savings Bank,	Salem,	Damages caused by taking of land at Lynn.
Seabury, Phoebe W.,	Dartmouth,	Damages caused by construction of State highway at Dartmouth
Sullivan, Timothy J., ³	Shrewsbury,	Damages caused by taking of land at Shrewsbury.
Temple, Theodore, ^{1,2}	Marlborough,	Damages caused by construction of State highway at Marlborough
Thimineur, Joseph, ¹	Marlborough,	Damages caused by construction of State highway at Marlborough.
Twiss, Michael F., ³	Shrewsbury,	Damages caused by taking of land at Shrewsbury.
Waite, Myra J., ^{1,2}	Deerfield,	Damages caused by construction of State highway at Deerfield
Warren, Alice E. M., ¹	Auburn,	Damages caused by construction of State highway at Auburn.
Wellington, Margaret J., ²	Braintree,	Damages caused by construction of State highway at Braintree.

¹ The municipality is defending the action.² Settled.³ Award to be paid by the Boston & Worcester Street Railway Company.

APPENDIX H.

SHOWING THE WORK DONE UNDER THE "SMALL TOWN" ACT SINCE ITS PASSAGE IN 1900.

[Section 17, chapter 47, Revised Laws.]

TOWNS.	ALLOTMENTS. ¹		LENGTHS BUILT (FEET).			Types of Roads.
	Previous to 1904.	In 1904.	Total to Dec. 31, 1904.	Previous to 1904.	In 1904.	Total to Dec. 31, 1904.
<i>Barnstable County.</i>						
Eastham,	\$196 00	-	\$196 00	1,150	-	1,150
Wellfleet,	1,653 00	-	1,653 00	2,250	-	2,250
	\$1,849 00	-	\$1,849 00	3,400	-	3,400
<i>Berkshire County.</i>						
Alford,	\$501 00	-	\$501 00	2,122	-	2,122
Egremont,	840 00	\$540 00	1,380 00	2,000	1,060	3,060
Florida,	1,216 00	-	1,216 00	2,500	-	2,500
Lanesborough,	922 00	552 00	1,474 00	2,614	2,000 ²	4,614
Monterey,	968 00	-	968 00	7,000	-	7,000
Mount Washington,	342 00	171 00 ²	513 00	-	-	-
New Ashford,	205 00	-	205 00	1,100	-	1,100
New Marlborough,	2,248 00	1,024 00	3,272 00	9,700	2,900 ²	12,600

¹ In many instances the towns have appropriated sums in addition to the allotments of the commission, thus making it possible to improve a greater length of road. The lengths shown as built represent the total length improved with all the money available. ² Work practically but not entirely completed. ³ Work not yet begun.

WORK DONE UNDER THE "SMALL TOWN" ACT—Continued.

TOWNS.	ALLOTMENTS. ¹			LENGTHS BUILT (FEET).			Types of Roads.
	Previous to 1904.	In 1904.	Total to Dec. 31, 1904.	Previous to 1904.	In 1904.	Total to Dec. 31, 1904.	
<i>Berkshire County — Concluded.</i>							
Otis,	\$1,272 00	-	\$1,272 00	4,000	-	4,000	Gravel road and culvert repairs.
Peru,	788 00	-	788 00	4,768	-	4,768	Gravel.

APPENDIX I.

REPORT OF EDWARD W. BREED ON TREE PLANTING.

CLINTON, MASS., Nov. 28, 1904.

To the Massachusetts Highway Commission.

GENTLEMEN:—After receiving from you a statement as to the number of trees that could be planted by the commission during the year 1904, a proposal was prepared, calling for bids for the furnishing of 4,000 trees. The contract was awarded to Ellwanger & Barry of Rochester, N. Y. The trees were to be shipped to South Lancaster, to a plot of ground kindly furnished the commission by Mr. Parker, and from this point they were reshipped to their desired destination, unless held here for fall shipment.

In company with members of your commission and division engineers, I visited such sections of the State roads as you had selected to be planted with trees, and decided what varieties to plant. Later, in company with the division engineers or their assistants, we drove stakes where each tree should be planted, marking the kind and number of tree. The ground was then prepared by the road superintendent of each division in accordance with directions given, varying as to natural conditions and requirements of each kind.

During the spring 1,425 trees were planted in the following sections:—

Fitchburg and Westminster,	395
Leicester and Spencer,	588
Yarmouth and Dennis,	447

Attention was given to every detail in the planting, which, with the very favorable weather that followed, produced very satisfactory results. In the above-mentioned planting the loss thus far has been less than one per cent.

When the trees were shipped, any tree that was not well supplied with roots was kept back to grow in the nursery during the summer, where, under more favorable circumstances, it would be less likely to die.

During the summer preparations for the fall planting were made by staking out, preparing of the ground, etc.

Upon digging the trees that had been growing in the nursery during the summer, it was wonderful to notice the large number of fibrous roots that had developed, ensuring satisfactory results in the future.

During the fall season 2,219 trees have been planted in the following sections : —

Townsend,	348
Fitchburg and Ashby,	601
Andover and North Reading, }	
Reading and Stoneham, }	673
Westwood, Norwood and Walpole,	256
Lee and Lenox,	123
Natick and Wellesley,	218

The trees have all received a mulching of strawy manure, and in a few instances, where they are exposed to high winds, they have been staked.

The ground at the nursery has been plowed and dressed with wood ashes.

There remain on hand 159 trees.

The table on the following page shows the varieties and distribution of the trees planted this year.

I wish to express to the commission my hearty appreciation of the very courteous attention that I have received from them, the division engineers and their assistants, all of whom seem interested in the work, which I trust will prove a lasting benefit to our Commonwealth.

Respectfully submitted,

E. W. BREED.
